Limitarianism is the view that one should not have too much of a valuable and scarce thing, and that there are various reasons to support this claim. After the initial statement I offered on limitarianism (Robeyns 2017), more papers have been published that contribute to the research agenda on limitarianism. Some of these papers have prompted me to revisit some conceptual work I advanced in the initial paper; in addition, some conceptual questions have so far remained unaddressed. In this paper, I aim to offer a comprehensive account of the structure of limitarianism: what are the different conceptual parts, and the various possibilities, when developing a limitarian theory.
